4.0 Prize Structure and Liability Limit

- 4.1 A winning ticket is one that bears the correct results for all event outcomes selected.
- 4.2 The prize for a winning ticket is calculated by multiplying the odds for each correct outcome together, and then multiplying that total by the wager. Rounding will occur throughout the calculation process. The Corporation may round at different points in the calculation process in order to ensure the integrity of this lottery game (for example, where the number of cents is less than five, the number shall be rounded down and where the number of cents is five or more, the number shall be rounded up).
- 4.3 An event is considered incomplete when one or more of the following criteria is met:
 - 4.3.1 The game is not completed in regulation play (or extra play, or a shoot-out, if any) prior to 5 a.m. Eastern Time, on the day following the original scheduled date.
 - 4.3.2 The teams listed for the event on the PRO•LINE List did not play a game on the date listed.
 - 4.3.3 The participant(s) listed for the event did not participate for the team(s) with whom they were listed in the game.
- 4.4 Any game that has commenced prior to the issuance of a ticket which included a wager on that event based on that game may, with respect to such ticket, be considered an incomplete event. This application will be based on the impact to all parties and will be applied at the Corporation's discretion.
- 4.5 When an event is considered to be an incomplete event, the outcomes for that event (Visitor Win, Home Win, Visitor+ Win, Home+ Win, Tie Win, Over Win and Under Win) shall be assigned an odds value of 1.00 and considered to be a correct result.
- 4.6 The calculation by the Corporation of the amount of the prize shall be final and binding.
- 4.7 The maximum prize amount available to be won on a ticket is \$600,000.
- 4.8 The "Daily net prize liability", for any day, shall be the total of all prizes won on all winning tickets included in the liability determination for that day, less the wager amount on such winning tickets.
- 4.9 The "Daily benchmark", for any day, shall be \$5 million plus twice the sales of all valid tickets issued and included in the liability determination for that day.
- 4.10 If the Daily net prize liability is greater than the Daily benchmark, then the prize amount won on a winning ticket shall be calculated as follows:

$$\text{Adjusted prize amount per ticket} = ((A - B) \times (C/D)) + B$$

- A = prize amount (before adjustment) for that ticket
- B = wager amount for that ticket
- C = Daily benchmark
- D = Daily net prize liability

5.0 Miscellaneous
